
Seminar of Power Quality in Dalian by The EU-Asia Power Quality Initiative China Alliance

Sponsored by ICA China, the seminar of EU-Asia Power Quality Initiative China Alliance had been successfully held in Dalian, Liaoning province on July 17th 2009.

The participants of the seminar included Li Haixue, PQ expert, the consultant for ICA China, Sun Zelin, Chief Engineer of Tianjing Jingkai Electrical Corp. Ltd., Miss Chen Min, Vice President of Times Group (Beijing), Xu Yi, Schneider Electric, Li Lingdong, Anhui University and sixty local participants from electrical enterprises, design institutions, end users and equipment manufacturers, etc.

Huang Wei, project manager for PQ of ICA China delivered an opening speech by briefing the member of the targets and action plan of the alliance. Professor Lin Haixue, China Electrical Power Research Institution, from a broad view, presented the basic concepts, theories, damages, standards and effects of power quality in detail in order to enhance the participants' the knowledge of power quality.

The co-sponsors made speeches and shared their experiences in the power quality aspect, like "Filter and Its Application" from Time Group (Beijing), case study of "Reactive Power and Harmonic Control" form Tianjing Jingkai Electrical Corp. Ltd and "Power Quality and Energy Conservation" form Schneider Electric. The participants from the seminar benefited greatly and furthermore, provided a platform for the designers and the end users for communication.

The seminar was organized in various ways: not only were the presentations by the experts but also the manufacturers and in addition communication between experts and manufacturers. Moreover, a lottery was held.

We hoped that the participants benefited a lot and got further knowledge of power quality.

The next seminar will be in Beijing in August 2009.
